## P.E.S. College of Engineering, Mandya - 571401

(An Autonomous Institution affiliated to VTU, Belagavi)
Second Semester, Master of Business Administration (MBA)
Semester End Examination; May/June - 2018
Quantitative Techniques
Time: 3 hrs
Max. Marks: 100
Note: i) Answer all FOUR full questions from PART - A and PART - B (Case study) is compulsory.
ii) Scientific calculators are allowed.

## PART - A

1 a. Explain the various rules of Probability.
b. Fit a Poisson distribution for the following data:

| $x:$ | 0 | 1 | 2 | 3 | 4 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $f:$ | 49 | 35 | 12 | 3 | 1 |

## OR

2 a. Explain the Baye's theorem of conditional probability.
b. The Probability of a new product acceptance in a market is estimated to be 0.7 . A sample of 5 persons is selected. What is the probability that, i) Exactly 3 persons are favoring the product, ii) None favor the product and iii) Atleast 1 favors the product.

3 a. Discuss the scope and applications of Operations Research.
b. Solve the following game:

|  |  | Player B |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | I | II | III | IV |
|  | I | 3 | 5 | 4 | 2 |
| Player A | II | 5 | 6 | 2 | 4 |
|  | III | 2 | 1 | 4 | 0 |
|  | IV | 3 | 3 | 5 | 2 |

4 a . Explain the various types of models in OR.
b. Solve the following game by graphical method:

## Player B

|  |  | $\mathrm{B}_{1}$ | $\mathrm{~B}_{2}$ |
| :---: | :---: | :---: | :---: |
| Player A | $\mathrm{A}_{1}$ | -2 | 4 |
|  | $\mathrm{~A}_{2}$ | 8 | 3 |
|  | $\mathrm{~A}_{3}$ | 9 | 0 |

5 a . Discuss the applications of LPP in management.
b. Solve the following LPP graphically:

Maximize $Z=x_{1}+1.5 x_{2}$

$$
\begin{aligned}
& \text { Subjected to constraints: } \quad 2 x_{1}+2 x_{2} \leq 16 \\
& x_{1}+2 x_{2} \leq 12 \\
& 4 x_{1}+2 x_{2} \leq 28 \\
& x_{1}, x_{2} \geq 0
\end{aligned}
$$

6 a. Explain the general structure of LPP with its components. Also mention the assumptions underlying LPP.
b. Convert the following LPP into its dual form:

Minimize $Z=3 x_{1}+2 x_{2}-3 x_{3}+x_{4}$

$$
\begin{array}{ll}
\text { Subject to constraints: } & x_{1}+x_{2}+x_{3}-x_{4} \geq 7 \\
& 2 x_{1}+5 x_{2}+3 x_{4} \geq 10 \\
& x_{1}+3 x_{3}+x_{4} \geq 11 \\
& x_{1}, x_{2}, x_{3}, x_{4} \geq 0
\end{array}
$$

7 a. Explain the steps involved in Hungarian method of solving assignment model.
b. Find IBFS for the following problem by VAM:

|  |  | Destination |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | $\mathrm{D}_{1}$ | $\mathrm{D}_{2}$ | $\mathrm{D}_{3}$ | $\mathrm{D}_{4}$ | Supply |
|  | $\mathrm{O}_{1}$ | 4 | 3 | 4 | 1 | 100 |
| Origins | $\mathrm{O}_{2}$ | 5 | 2 | 3 | 2 | 40 |
|  | $\mathrm{O}_{3}$ | 4 | 6 | 2 | 5 | 60 |
| Demand |  | 75 | 50 | 75 | 50 |  |
|  | OR |  |  |  |  |  |

8 a. Find IBFS for following problems by, i) NWCR ii) LCM

|  | P | Q | R | S | Supply |
| :---: | :---: | :---: | :---: | :---: | :---: |
| A | 6 | 8 | 4 | 3 | 10 |
| B | 7 | 5 | 6 | 3 | 30 |
| C | 9 | 8 | 7 | 4 | 20 |
| Demand | 15 | 15 | 15 | 15 |  |

b. Solve the following assignment problem given that the matrix below is a profit matrix

|  | $\mathrm{B}_{1}$ | $\mathrm{~B}_{2}$ | $\mathrm{~B}_{3}$ | $\mathrm{~B}_{4}$ |
| :---: | :---: | :---: | :---: | :---: |
| $\mathrm{~A}_{1}$ | 6 | 1 | 8 | 4 |
| $\mathrm{~A}_{2}$ | 3 | 2 | 1 | 6 |
| $\mathrm{~A}_{3}$ | 7 | 5 | 9 | 3 |
| $\mathrm{~A}_{4}$ | 4 | 7 | 6 | 8 |

## PART - B (Case Study)

9. A company has identified the demand pattern for its products in markets with the following details:

| Daily Demand | Probability |
| :---: | :---: |
| 0 | 0.01 |
| 15 | 0.15 |
| 25 | 0.2 |
| 35 | 0.5 |
| 45 | 0.12 |
| 50 | 0.02 |

Consider the following random numbers and run the simulation for 10 days and find the average demand. $21,27,47,54,60,39,43,91,25,20$. Further if the company wants to decide on either to produce 32 units or 29 units per day. Selling price being `60 . The total cost being` 40 . In case there are unsold units, it should be disposed at `5 P.u. In case of unsatisfied demand, it has a penalty cost` 10 P.u. You are required to help the management in deciding how many units to produce taking cost into account.
